**Programming:** Typescript, Python, PHP, C++, C, Ruby on Rails, HTML, CSS, React, Next.JS, SQL, MongoDB, Windows

## PROFESSIONAL EXPERIENCE

---

**Computer Science Tutor | Tutor.com | Remote**

**Dec 2024 - Present**

- Guided students through complex computer science topics, including PHP, CSS, HTML, Python, internet fundamentals, and database systems, helping them build strong foundational and practical skills.
- Fostered an engaging and supportive learning environment, resulting in consistently high student satisfaction ratings and repeat customers.
- Tailored personalized tutoring strategies to suit individual learning styles, ensuring concepts were effectively understood.

**Web Developer | CognitiveMetrics, LLC | Remote**

**Jun 2023 - Present**

- Implemented advanced SEO techniques, leading to a 24% revenue increase and a 64% boost in site traffic, significantly enhancing the company's digital footprint.
- Collaborated with designers and developers to create innovative and user-friendly UI/UX features that improved customer satisfaction and usability.
- Streamlined the codebase by identifying and resolving inefficiencies, optimizing application performance, and ensuring robust scalability.

## PROJECTS

---

**Psychopedia | CognitiveMetrics, LLC**

- Developed a comprehensive psychometrics wiki to democratize access to psychometric knowledge, making advanced topics accessible to educators, researchers, and students.
- Integrated interactive data visualization tools to enhance user engagement and understanding.
- Designed the platform to be a central hub for psychometric resources, fostering collaboration within the field.

**Psychometric | CognitiveMetrics, LLC**

- Built a versatile NPM library tailored for Psychometricians, Psychologists, and other professionals, streamlining workflows with built-in psychometric formulae.
- Focused on modern JavaScript frameworks with full TypeScript compatibility, ensuring ease of adoption by development teams.
- Enhanced documentation and examples to make the library approachable for users with varying levels of expertise.
